IT-SECURITY SUMMIT

14th APRIL 2026

Tivoli Kopke Porto Gaia Hotel

AN EVENT DESIGNED FOR ENTERPRISES AND PUBLIC SECTOR ORGANISATIONS IN PORTUGAL

Building on the success of its first edition, IT Security Magazine is proud to present the second edition of the IT Security Summit Porto, an in-person event taking place in April 2026, in Porto.

This exclusive summit focuses on cybersecurity, resilience, and compliance, with a particular emphasis on the practical needs of enterprises and public sector organisations in Northern Portugal — a region renowned for its strong industrial base, technological innovation, logistics and transport, agrifood, and tourism sectors.

The event provides a unique environment for CISOs, CSOs, CIOs, CTOs, and senior IT leaders to exchange experiences and explore strategies that strengthen organisational resilience and trust. It offers sponsors and institutional partners an exceptional opportunity to engage with key decision-makers from some of the region's most relevant organisations, positioning their brands alongside the leaders shaping Portugal's digital security agenda.

The IT Security Summit Porto stands out for its focused and pragmatic approach — amplifying the voice of CISOs and promoting interactive discussions, real-world case studies, and strategic collaboration among corporate and public-sector leaders.

By supporting this initiative, sponsors contribute directly to the development of a more secure, resilient, and digitally prepared business and institutional community, while gaining visibility and access to a dynamic and influential audience.

CONFERENCE KEY TOPICS

The IT Security Summit Porto 2026 will present a comprehensive programme of high-level keynotes, interactive panel discussions, and case studies that address the most relevant challenges in today's cybersecurity landscape. Designed to foster knowledge exchange and collaboration between senior leaders from both the private and public sectors, the summit will focus on strengthening organisational resilience, governance, and trust.

Throughout the day, CISOs and security executives will share their experience and best practices, discussing how their organisations manage risk, respond to incidents, and align security with strategic business goals. Key topics will include leadership and success strategies for CISOs, cyber resilience and incident response, cloud and zero trust security, governance and compliance, measuring the return on security investments, crisis communication, and the role of data protection, privacy, and identity management in maintaining digital trust.

IT SECURITY SUMMIT 2026
